

Team Contributions: Final Software Engineering

Team #12, Streamliners
Mahad Ahmed
Abyan Jaigirdar
Perna Prabhu
Farhan Rahman
Ali Zia

This document summarizes the contributions of each team member for the final demonstration and documentation. The time period of interest is the time between Rev 0 and the Final documentation; the contributions prior to Rev0 are NOT included.

1 Team Meeting Attendance

Student	Meetings
Total	7
Mahad Ahmed	7
Abyan Jaigirdar	7
Perna Prabhu	7
Farhan Rahman	7
Ali Zia	7

The team arranges meetings almost weekly, to clarify objectives and align on priorities on major deliverables, with additional meetings scheduled as needed, typically in the days leading up to major deadlines. We have held a total of seven meetings in the time period of interest. Every team member has been able to attend these meetings, even if occasionally arriving slightly late or needing to leave early.

2 Supervisor/Stakeholder Meeting Attendance

Supervisor's Name: Luke Schuurman

Student	Meetings
Total	1
Abyan	1
Ali	1
Farhan	1
Mahad	1
Prerna	1

Supervisor meetings were arranged when objectives and priorities needed to be clarified and all members attended those meetings. This period of interest we diverged from the original capstone plan and only decided to have one meeting to discuss the action plan and approach the team was going to take.

3 Lecture Attendance

Between the Rev 0 and the Final demos, there has been approximately 1 lecture held as part of the course schedule.

Student	Lectures
Total	1
Mahad Ahmed	0
Abyan Jaigirdar	0
Prerna Prabhu	1
Farhan Rahman	0
Ali Zia	0

Due to timing of the lecture and scheduling conflicts, only one team member who lives closest to the university was able to attend the lecture. The team member who attended the lecture shared the information with the rest of the team and we had a discussion about it in our next team meeting.

4 TA Document Discussion Attendance

TA's Name: Tiago de Moraes Machado

Student	Lectures
Total	1
Mahad Ahmed	0
Abyan Jaigirdar	0
Prerna Prabhu	0
Farhan Rahman	0
Ali Zia	0

During the time period between the Rev 0 and Final document deadlines, there was one TA document discussion session. None of the members were able to attend the TA document discussion session due to scheduling conflicts, religious reasons, and injuries.

5 Commits

[For each team member how many commits to the main branch have been made over the time period of interest. The total is the total number of commits for the entire team since the beginning of the term. The percentage is the percentage of the total commits made by each team member. —SS]

Student	Commits	Percent
Total	Num	100%
Name 1	Num	%
Name 2	Num	%
Name 3	Num	%
Name 4	Num	%
Name 5	Num	%

[If needed, an explanation for the counts can be provided here. For instance, if a team member has more commits to unmerged branches, these numbers can be provided here. If multiple people contribute to a commit, git allows for multi-author commits. —SS]

6 Issue Tracker

[For each team member how many issues have they authored (including open and closed issues (O+C)) and how many have they been assigned (only counting closed issues (C only)) over the time period of interest. —SS]

Student	Authored (O+C)	Assigned (C only)
Name 1	Num	Num
Name 2	Num	Num
Name 3	Num	Num
Name 4	Num	Num
Name 5	Num	Num

[If needed, an explanation for the counts can be provided here. —SS]

7 Team Charter Trigger Items

7.1 Summary of Triggers

The team charter established several quantified triggers to help maintain accountability and ensure consistent contribution throughout the project. These include:

- **Attendance:** Members are expected to maintain a 100% attendance rate for all scheduled meetings unless an acceptable excuse (such as a health issue or family emergency) is provided.
- **GitHub Activity:** Each member must demonstrate consistent GitHub activity every week, with issues actively in progress or commits made for review.
- **Task Completion:** All assigned work must be completed and delivered on time according to deadlines set during weekly meetings.

7.2 Trigger Violations

Throughout the period between Rev 0 and the Final demonstration, the team has not experienced any major violations of the triggers outlined in the charter. All members maintained full attendance at team meetings, continued to show consistent GitHub activity, and met their assigned deadlines. As in the previous period, minor delays in individual tasks occurred on occasion, but these were communicated promptly and resolved collaboratively without affecting the overall project timeline or deliverables.

7.3 Plan to Address Violations

As the project is now concluding, the three-step escalation process defined in the charter was not needed at any point during the project:

1. First incident: verbal reminder during team meeting.
2. Second incident: discussion with the TA to address underlying issues.

3. Third or repeated incidents: escalation to the course instructor.

Overall, the triggers proved to be appropriately calibrated for the team. The expectations around attendance, GitHub activity, and task completion were realistic and effective in maintaining accountability without being overly restrictive. The team found that open communication and early reporting of potential delays were sufficient to prevent any formal violations from occurring throughout the entire duration of the project.

8 Additional Productivity Metrics

[If your team has additional metrics of productivity, please feel free to add them to this report. —SS]
